

## How to print and release jobs using Papercut Mobility on Android devices

\* You must be on the Yale Secure Network and logged into VPN

Papercut Mobility allows you to touchless print and release a print job from a BluePrint queue using a mobile device.

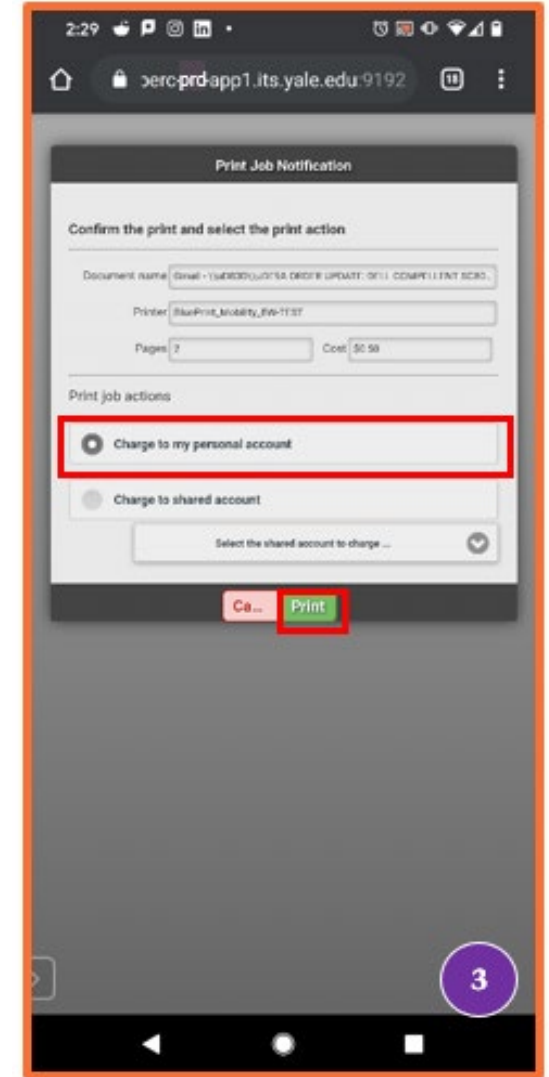

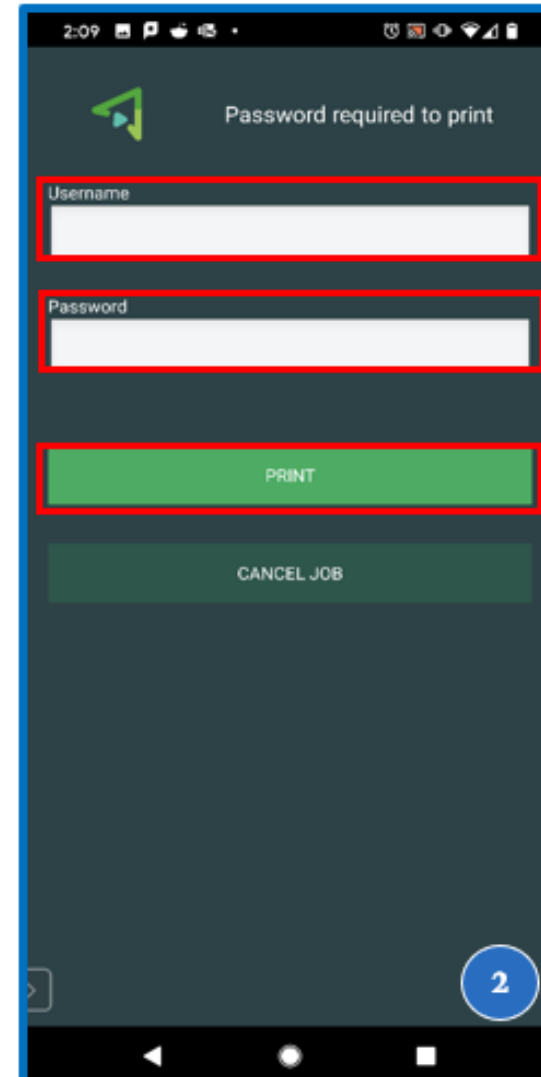

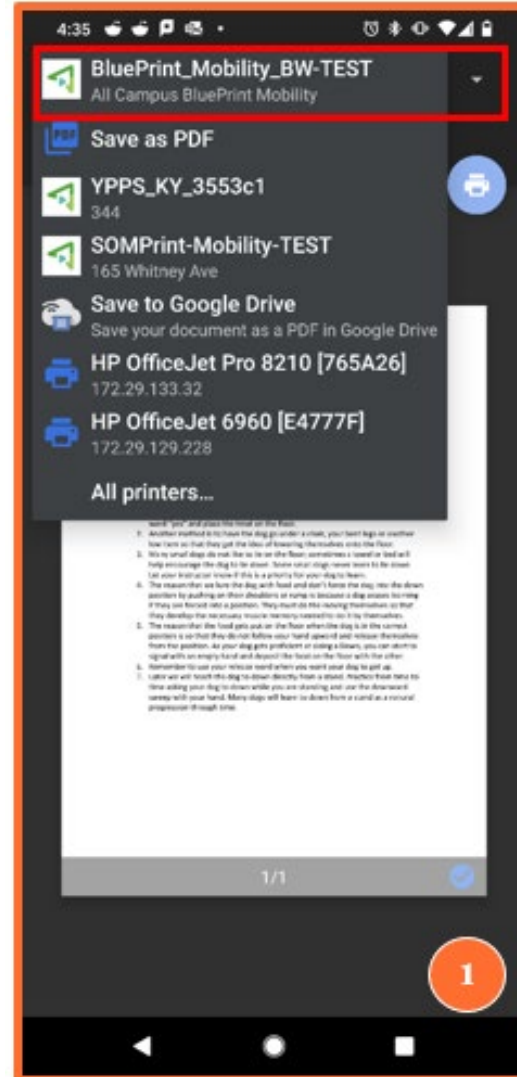

**Note:** The Papercut Mobility app must be installed on your mobile device before printing. You must be on the Yale Secure Network and logged into VPN. For details, see [Off Campus Access VPN: Setup and connect to Yale VPN with your Android Devices.](#)

1 When printing from any application, select **BluePrint** queue. Complete print options.

2 Enter your **Username** and **Password**, then select **Print**.

3 Navigate to <https://ypps.yale.edu/mobileprint/release/login> using your browser or a shortcut on your Home screen.

Select the account to charge, then **Print**.
