How to print and release jobs using Papercut Mobility on iPhone or iPad

* You must be on the Yale Secure Network

Papercut Mobility allows you to touchless print and release a print job from a Blueprint queue using a mobile device.

**Note:** The printer profile must be installed on your mobile device before printing.

When printing from any application, select the Blueprint queue. Complete the print options, then select Print.

1. When printing from any application, select the Blueprint queue. Complete the print options, then select Print.

2. Select OK.

3. Select the printer, then OK.

4. Navigate to [https://ypps.yale.edu/mobileprint/release/login](https://ypps.yale.edu/mobileprint/release/login) using Safari or a shortcut on your Home screen. When you are standing next to the printer, select the item then Release.
